

Recent Trends in Artificial Intelligence and Data Sciences

Select Proceedings of CONFLUENCE 2026, Volume 1

This book contains original, peer-reviewed and presented research papers from the International Conference on Recent Trends in Artificial Intelligence and Data Sciences. This book intends to provide a distinctive and engaging latest research development held in the field of various data sciences and computational techniques. The topics covered in this book are artificial intelligence, machine learning, data science, deep learning, soft computing and various computational techniques. Apart from these, many other topics of interest for readers are also covered. The papers presented here share the latest findings on various topics mentioned above. It makes the book a useful resource for researchers, scientists, industry people and students alike.
