

Developing a Global Framework for AI Governance

Summary Report of the International AI Cooperation and Governance Forum 2022–2024

Based on the discussions of the International AI Cooperation and Governance Forum 2022-2024, this book offers a synthesis of research on artificial intelligence (AI) development and governance. Chapters include AI research development, AI ethics and governance, AI safety and governance, AI Industry development and governance, and AI for sustainable development, providing a complementary and detailed research landscape on AI governance. The book focuses on the governance challenges in the AI-empowered industry and discusses potential solutions to promote ethical and responsible AI innovation and development. It is thus not only relevant for academics but also for practitioners.
