

Environment and Sustainable Development

Proceedings of the 2025 10th Asia Conference on Environment and Sustainable Development

This book is a collection of selected, peer-reviewed papers presented at the 2025 10th Asia Conference on Environment and Sustainable Development (ACESD), held in Fukuoka, Japan, November 8–10, 2025. The conference fosters communication among scholars and researchers in a wide variety of scientific areas with a common interest in improving environment and sustainable development-related techniques. The book covers highly diverse topics, including climate changes, carbon capture and storage, atmospheric physics, physical oceanography, water quality and treatment, reclaimed waters, ground water remediation, soil decontamination, waste minimization, recycling and reuse, and air pollution and control, among others. The book is a valuable resource for researchers, practitioners, and policymakers working in the field of environmental science and engineering.
