Frontiers in Construction Technology and Management Practices Volume 2

Bridging Innovation with Practical Solutions

This book presents the select proceedings of the International Conference on Construction, Real Estate, Infrastructure, and Project Management (ICCRIP 2025) and explores recent and innovative developments in all aspects of the Construction, Real Estate, Infrastructure, and Project Management (CRIP) sector. Further, the main focus area of the book covers construction project delivery: challenges and solutions, trends in modern construction materials and methods, sustainability challenges in the CRIP sector, Diversity, Equity, and Inclusion (DEI) in the CRIP sector, disaster management and resilience in the built environment, grand challenges in management of projects, management solutions to CRIP sector challenges, innovations in pedagogical approaches in CRIP education, innovations in real estate, architecture and urban planning, social infrastructure sector: addressing research and policy gaps, and data-driven performance optimization in construction sector. Researchers, academicians, and professionals involved in Construction/Project management, Civil engineering, and related fields will find this book to be helpful.
