

Deep Learning for Spatio-temporal Data Mining

Systematically explains deep learning for spatio-temporal mining, clarifying task logic and technical pathways Progresses from basic tasks to emerging applications, effectively lowering the threshold for research and learning Combines theoretical methods with real-world cases, guiding researchers from model design to practical application

Systematically explains deep learning for spatio-temporal mining, clarifying task logic and technical pathways Progresses from basic tasks to emerging applications, effectively lowering the threshold for research and learning Combines theoretical methods with real-world cases, guiding researchers from model design to practical application

*vorbestellbar, Erscheinungstermin ca.
Januar 2027*

Artikelnummer: 9789819256044

Medium: Buch

ISBN: 978-981-9256-04-4

Verlag: Springer

Erscheinungstermin: 16.01.2027

Sprache(n): Englisch

Auflage: Erscheinungsjahr 2027

Serie: Big Data Management

Produktform: Gebunden

Seiten: 344

Format (B x H): 155 x 235 mm
