

Artificial Intelligence, Data Science and IoT for Next Generation Computing

Select Proceedings of the 3rd International Conference, AICTA 2025

This book presents the proceedings of the 3rd International Conference on Artificial Intelligence, Computing Technologies, Internet of Things (IoT), and Data Analytics. The proceedings highlight research in distributed, parallel, and cloud computing, image processing and computer vision, machine learning and deep learning, the Internet of Things (IoT) and data analytics, cybersecurity, and related interdisciplinary domains. The book discusses recent innovations, practical challenges, and future research directions in computer science and engineering. These proceedings reflect this integration, offering a comprehensive platform for advancing theory, applications, and interdisciplinary research across these key domains.
