

Advances in Engineering Materials

Select Proceedings of FLAME 2022

This volume comprises the select proceedings of the 3rd Biennial International Conference on Future Learning Aspects of Mechanical Engineering (FLAME) 2022. It aims to provide a comprehensive and broad-spectrum picture of the state-of-the-art research and development in material science and engineering. Various topics covered include metals and composites, energy systems, advanced materials processing, materials synthesis and processing, nanotechnology, polymers and ceramics, material for semiconductor devices, fabrication technique, corrosion and degradation, corrosion, welding of advanced materials, etc. This volume will prove a valuable resource for researchers and professionals in materials engineering.
