EPC Handbook

A practical guide and reference book for the EQE legal exams and EPAC

For candidates preparing for the European Qualifying Examination (EQE) or the European Patent Administration Certification (EPAC), mastering the European Patent Convention is crucial. The EPC Handbook offers a clear, exam-focused presentation of the relevant legal framework - ideal for targeted preparation and quick reference during the exam. Based on the well-established D-I Guide - Part 1 of 2: EPC (2024) by Ignacio Lobato, this book is now published as a standalone volume in the Heymanns IP series »Heymanns Intellectual Property«. Key benefits: • Concise and exam-oriented: Bullet-point summaries instead of lengthy commentary - directly applicable in exam scenarios. • Colour-coded structure: Legal bases, time limits, and cross-references are intuitively highlighted for faster navigation. • Up to date: Reflects all legal changes up to July 2026 and fully aligned with the EQE 2027 and EPAC. Aligns with the new eEQE and EPAC formats. • Practice-focused: Includes tables, examples, and overviews on fees, priority, national phase requirements, and more. Chapter overview: • Chapters 1-10: • Time limits · • Legal remedies • Fees • Prior art & patentability • Communications & decisions • Right to patent • Rights conferred by application/patent • Amendments • Languages • Representation • Chapter 11-14 • Priority • Filling • Search & examination • Validation • Chapter 15-18 • Opposition • Appeal • Petition for review • Limitation/revocation For EQE or EPAC candidates, mastering the EPC, the PCT and the UP system is essential to excel in the exams. The EPC Handbook, together with the PCT & UP Handbook, condenses legal texts, case law, and procedural frameworks into an exam-ready, quick reference that turns anxiety into certainty on every legal question. Edited by: Ignacio Lobato is Swiss and Spanish and lives in Munich, Germany. He studied Mechanical Engineering at ETH Zurich and spent two years in the simulation department in the automotive sector before moving internally to the patent department. He qualified as a European Patent Attorney in 2022 and has since tutored the annual D1 (now F/M2) study group at Fillun. Ignacio is currently finalising his training to become a German Patent Attorney, with qualification expected by the end of 2025. Ihre Vorteile auf Wolters Kluwer Online: • Onlineausgabe des Werks - überall, jederzeit und schnell verfügbar - mit zusätzlichem Zugriff auf die im Werk verlinkten, weiteren Wolters Kluwer Inhalte • Bereits ab dem ersten Abonnement erhalten Sie Zugriff auf die umfangreiche Rechtsprechungs- und Gesetzesdatenbank • Unser aktives Portfolio-Management berücksichtigt fortlaufend die aktuellen Rechtsentwicklungen • Digitale Helfer wie die Such-Funktion, Dual View, Alerts und der Fassungsvergleich unterstützen Sie beim effizienten Arbeiten
