

Geological Journal is an interdisciplinary geosciences journal publishing research across all branches of geology and the geological sciences, including sedimentology and geomorphology, palaeontology, quaternary geology and environmental change, tectonics and structural geology, geochemistry and geochronology, metamorphic geology, and volcanic and igneous geology. The journal has a particular interest in publishing original research papers on regional case studies from any location where the conclusions are of general interest, and publishes Special Issues with a common theme or regional coverage.
