

Russian Engineering Research

Russian Engineering Research is a journal that represents a selection of translated articles from two of the oldest Russian journals on mechanical and production engineering: – Vestnik Mashinostroeniya and STIN . The journal covers the development of different branches of mechanical engineering, new technologies, and tools for machine and materials design. Emphasis is on operations research and production-line layout, industrial robots and manipulators, quality control and process engineering, kinematic analysis of machine assemblies, and computerized integrated manufacturing systems.
