

Radiography

Radiography is the official peer-reviewed journal of the Society and College of Radiographers and the European Federation of Radiographer Societies. Radiography promotes evidence-based practice by disseminating high quality clinical, scientific and educational research related to all aspects of diagnostic and therapeutic radiography. We publish research articles, systematic and narrative reviews, editorials and letters of international relevance that advance knowledge and encourage innovation within radiography. We welcome radiography research submissions that embrace robust and innovative qualitative, quantitative and mixed method approaches. Radiography is essential reading for researchers, radiographer practitioners, radiography educators and student radiographers. We aim to influence clinical practice and patient care by informing practitioners, managers, leaders and policy makers working within or aligned to clinical imaging and radiation therapy services.
