

Neurocirugía (Neurosurgery) is the official Journal of the Spanish Society of Neurosurgery (SENEC). It is published every 2 months (6 issues per year). Neurocirugía will consider for publication, original clinical and experimental scientific works associated with neurosurgery and other related neurological sciences, as well as articles requested from experts, consensus documents and clinical guidelines, clinical cases, opinion articles, and any other information of interest for neurosurgeons. The Editorial Committee is appointed independently of the governing bodies of the Society. All manuscripts are submitted for review by experts in the field (peer review), separate from the Journal Editorial Committee, and are carried out anonymously (double blind). The Journal is published in two versions (Spanish and English) although it accepts works only written in Spanish.
