SAGE Publishing

Advances in Structural Engineering

Advances in Structural Engineering was established in 1997 and has become one of the major journals in the field of structural engineering. To better fulfil the mission of the journal, we have recently decided to launch two new features for the journal: (a) invited review papers providing an in-depth exposition of a topic of significant current interest; (b) short papers reporting truly new technologies in structural engineering. With the addition of these two new features, ASE publishes articles in the following categories: - Research Papers - Invited Review Papers - Technical Notes - New Technology Technical Notes - Book Reviews - Announcements - Editorials
