

Philosophical Investigations

Philosophical Investigations is an esteemed scholarly journal with a lively readership, publishing articles in every branch of philosophy, including ethics, epistemology, perspectivism, diachrony and synchrony. Each issue contains thought-provoking articles, an acclaimed discussion section, and wide-ranging book reviews. As an international publication both in terms of authorship and readership, we aim to publish works of merit which deal with relevant topics from across the field of philosophy that would be of interest to both professional philosophers and people of wider educated backgrounds.
