John Wiley & Sons

Archaeometry

Archaeometry is an international research journal covering the application of the physical and biological sciences to archaeology, anthropology and art history. Topics covered include dating methods, artefact studies, mathematical methods, remote sensing techniques, conservation science, environmental reconstruction, the study of humans and their environment, biological anthropology and archaeological theory. Papers are expected to have a clear archaeological, anthropological or art historical context, be of the highest scientific standards, and to present data of international relevance.
