

Ocean Dynamics

Theoretical, Computational and Observational Oceanography

Ocean Dynamics is an international journal that aims to publish high-quality peer-reviewed articles in the following areas of research: - Theoretical oceanography (new theoretical concepts that further system understanding with a strong view to applicability for operational or monitoring purposes) - Computational oceanography (all aspects of ocean modeling and data analysis) - Observational oceanography (new techniques or systematic approaches in measuring oceanic variables, including all aspects of monitoring the state of the ocean) - Articles with an interdisciplinary character that encompass research in the fields of biological, chemical and physical oceanography are especially encouraged.
