

WIREs Computational Molecular Science

The WIREs Computational Molecular Science use the techniques of chemical as well as physical theories and computer-based modeling to examine and elucidate all aspects of the molecular sciences. These approaches bridge chemistry, biology, the materials sciences, and neighboring application-driven fields. WIREs Computational Molecular Science – part of the award-winning Wiley Interdisciplinary Reviews series – is a reviews journal highlighting research from all these fields. Wiley Interdisciplinary Reviews (WIREs) promote a cross-disciplinary research ethos. We are an evolving online database of cutting-edge reviews and a platform for thought-provoking perspectives on current issues in the research community.
