

Landscape and Ecological Engineering

Landscape and Ecological Engineering is published by the International Consortium of Landscape and Ecological Engineering with the aim of protecting and improving the environment in the face of biodiversity loss, desertification, global warming, and other environmental conditions. The journal presents original papers, reports, reviews and technical notes on all aspects of conservation, restoration, and management of ecosystems. Its scope is not limited to purely scientific approaches, but welcomes technological and design approaches that provide useful and practical solutions to today's environmental problems. The coverage is relevant to students and researchers at universities and institutes, while its emphasis on the practical application of research will interest all decision makers dealing with landscape planning and management problems.
