

Pediatric Obesity is devoted to research into obesity during childhood and adolescence. This topic is currently at the centre of intense interest in the scientific community and is of increasing concern to health policymakers and the public at large. We have established ourselves as the leading journal for high quality papers in this field, covering all areas of pediatric obesity. Pediatric Obesity is owned by the World Obesity Federation, a not-for-profit charitable body linking over 50 regional and national associations with over 10,000 professional members in scientific, medical and research organisations.
