Biomass Conversion and Biorefinery

Processing of Biogenic Material for Energy and Chemistry

Thorough coverage of environmentally sound and economically viable processes for biomass conversion - Focuses on the technical, chemical and system aspects of Biomass Conversion and Biorefinery - Operates in the topical areas of Bioengineering, Renewable Energy, and Environmental Protection Biomass Conversion and Biorefinery presents articles and information on research, development and applications in thermo-chemical conversion; physico-chemical conversion and bio-chemical conversion, including all necessary steps for the provision and preparation of the biomass as well as all possible downstream processing steps for the environmentally sound and economically viable provision of energy and chemical products.
