Elsevier

Current Opinion in Chemical Engineering

Current Opinion in Chemical Engineering is devoted to bringing forth short and focused review articles written by experts on current advances in different areas of chemical engineering. Themed sections: Each review will focus on particular aspects of one of the following themed sections of chemical engineering: -Nanotechnology -Energy and environmental engineering -Biotechnology and bioprocess engineering -Biological engineering (covering tissue engineering, regenerative medicine, drug delivery) -Separation engineering (covering membrane technologies, adsorbents, desalination, distillation etc.) -Materials engineering (covering biomaterials, inorganic especially ceramic materials, nanostructured materials). -Process systems engineering -Reaction engineering and catalysis.
