

Current Opinion in Biomedical Engineering

Current Opinion in Biomedical Engineering provides systematic and focused reviews of the latest developments in different areas of the field of biomedical engineering. Themed Sections: Each issue will review up to two of the major themes of biomedical engineering outlined below. In doing so, the Journal will serve as an invaluable resource to help bridge knowledge gaps amongst the researchers, academics, clinicians, professionals, and students with specializations in the various sub-disciplines of this field. -Biomaterials - Biomechanics and mechanobiology -Biomedical imaging -Future of biomedical engineering -Molecular and cellular engineering -Neural engineering -Novel biomedical technologies -Tissue engineering and regenerative medicine
