Elsevier

# Current Opinion in Physiology

Current Opinion in Physiology publishes invited reviews that reflect and shape current opinion on physiology and its future directions. The journal provides specialists, researchers, lecturers, and students a unique platform to keep up to date with the expanding volume of information published in the field by providing the views of experts on current advances in the field of physiology in a concise and readable format, and evaluations of the most interesting papers, annotated by experts, from the great wealth of recent original publications. Papers will reflect the wide range of multidisciplinary approaches that are used to investigate questions in this field, including integration of physiology at the systems, cellular and molecular levels.
