

F&S Reviews part of the Fertility and Sterility family of journals, publishes both systematic and comprehensive, authoritative review articles spanning reproductive medicine or science. F&S Reviews will consider review articles that inform clinical practice based on emerging and established evidence from clinical research as well as reviews that advance our understanding of human reproduction based on contemporary studies in the reproductive sciences. F&S Reviews accepts the following types of articles: systematic reviews, meta-analyses, comprehensive reviews, and critical analytic reviews of published literature. F&S Reviews does not accept the following types of articles: surveys, editorials, original research, or case reports.
