

Atomic Processes in Plasmas

The 15th International Conference on Atomic Processes in Plasmas

This volume reports the latest work of 37 leading researchers invited to speak at the 15th International Conference on Atomic Processes in Plasmas. All papers have been peer-reviewed. The topics span 11 orders of magnitude of temperature (from laser-cooled particles to fusion reactors) and 25 orders of magnitude of length scale (from nanolithography to astrophysics).
