

Newnes Electronics Starter Pack Ultimate CD

The Ultimate Value for Electronics Newbies Most engineers rely on a small core of books that are specifically targeted to their job responsibilities. These dog-eared volumes are used daily and considered essential. But budgets and space commonly limit just how many books can be added to your core library. The Newnes Electronics Starter Pack CD solves this problem. It contains six of our best-selling titles, providing the "next level" of reference you will need for a fraction of the price of the hard-copy books purchased separately. The CD contains the complete PDF versions of the following Newnes titles: • Electrical Engineering 101 (Ashby) 0750678127 • Designing Embedded Systems with PIC Microcontrollers (Wilmshurst) 0750667559 • Starting Electronics Construction (Brindley) 0750667362 • Electronics Made Simple 2e (Sinclair) 075065368X • Robotics, Mechatronics, and Artificial Intelligence (Braga) 0750673893 • RSGB Radio & Electronics Cookbook (RSGB) 0750652144
